Dear Executive Director Gbur, Superintendent Moser:

Since I last addressed the Board, I obtained the plat of subdivision for Baldwin Hills subdivision. The 1.4 mile long strip of vacant land where I proposed a trail does in fact consist of a trail easement (30 feet wide) and a planting strip (varies from 125 to 195 feet wide).

Last night I presented to the Inverness Park District Board. They responded favorably to the trail and underpass proposal. They stated they are willing to meet with you and IDOT to discuss the feasibility of a pedestrian tunnel under the south approach to the Dundee Road bridge over Union Pacific RR.

In IDOT's September response to Moser's letter, they stated they would be willing to meet to discuss their response. I am proposing that a meeting be set up between Palatine Park District, Inverness Park District, IDOT and other interested parties to discuss the feasibility and costs of a culvert, which could be capped with fill on each end until such time the trail could be built.

Dundee Road bridge reconstruction has recently begun. Please let me know if Palatine Park District is willing to set up or attend this meeting.

Sincerely,

Steve Breese
Palatine resident
